EXPERIENCE

Oracle • Principal User Experience Designer — Remote

Nov 2021 - Oct 2025 • 4 years • Large Corporation

- Led the complete UX processes of two Oracle Cloud Infrastructure platform services: Application Performance Monitoring and Database Management.
- Utilized a variety of iterative and collaborative design methodologies at a large scale to create innovative features and UX improvements, including user research, wireframing, prototyping, design spec creation and more.
- Leveraged deep familiarity with design systems and component patterns to quickly and effectively mockup new designs within Oracle's OCI and Redwood style guides.
- Presented designs to key decision makers to build consensus and guide the development roadmap.
- Worked directly with technical leads of large development teams to hand-off designs and provide ongoing design support.

Duetto • Senior User Experience Designer — Remote

Jan 2021 - Nov 2021 • 11 months • Startup

- Led iterative design processes consisting of user research, user flows, sketches, wireframes, prototypes, and high fidelity specs alongside frequent internal stakeholder and customer critique and validation.
- Directly interfaced with customers to gain a strong understanding of who they are, their goals, needs, pain points, and how they wish to work within our products.
- Collaborated with PM, Engineering, C-suite, and other internal teams in order to create ideal solutions for given timelines, resources, and technical constraints.
- Presented designs to the company to generate buy-in with persuasive storytelling.

EDUCATION

Bachelors of Science Product Design

Barrett, the Honors College,
Arizona State University
2010 - 2014 | Tempe, AZ
Grade: Summa Cum Laude

UX Design Certificate

Thoughtful Academy
2017

Design & Foundations

Pragmatic Institute
2021

SKILLS

User Experience Design

Interface Design

User Research

Wireframing

Prototyping

Figma

Sketch

Usability Testing

Graphic Design

Branding

Asset Management

Web Design

Balsamiq

Adobe Suite

- Collaborated with front-end development teams to create and maintain a Design Language, Design System, and comprehensive, modern Component Library.
- Engaged in ongoing Jira ticket specification and support to provide engineers a seamless hand-off and continual guidance based on design documents.

AppGuard • Senior User Experience Designer — *Chantilly, VA*

Feb 2018 - Dec 2020 • 3 years • Startup

- Evaluated AppGuard Inc. products and competing products to identify opportunities to enhance user comprehension, streamline usability, and implement modern aesthetics.
- Designed user interface prototypes based on evaluation results and requirements as specified by engineering and product management to guide development.
- Created and presented detailed design mockups and graphics to director-level and C-Suite stakeholders to show progress and achieve consensus on future development.
- Reviewed implementation plans with software engineering counterparts and provide continual support for asset management and design direction.
- Refined UI design based on feedback from end-users and AppGuard colleagues.

Epiphany Productions • Web and UX Designer — *Del Ray, VA*

Oct 2016 - Feb 2018 • 1 year 5 months • Startup & Non-profit

- Designed, administered, and maintained 10+ websites utilizing user-centered design practices and CMS for a variety of clients, including current members of congress, political organizations, and international non-profits.
- Utilized modern UX design processes including user journey mapping, wireframing, and prototyping into the design of websites, database portals, and apps.
- Designs key brands, graphics, websites, and marketing materials for major DC events, including the 2017 Bipartisan Presidential Inaugural Ball and the 2017 Congressional Baseball Game.
